

AUTHOR INDEX TO VOLUME 4

Adeli, H., 4:133, 163, 175, 243, 247, 321
Alarcon, E., 4:11

Belytschko, T., 4:245

Cameron, G. E., 4:289
Cerroloza, M., 4:11
Chang, H. Y., 4:167
Chang, S.-C., 4:257
Chehayeb, F. S., 4:1
Chen, Y. S., 4:175
Chen, Y. Z., 4:317
Cheng, Y. M., 4:297
Chow, W. K., 4:217
Connor, J. J., 4:1

Davidson, J. W., 4:61

Edgar, T. V., 4:81

Forde, B. W. R., 4:205

Goulter, I. C., 4:61
Grierson, D. E., 4:289

Hawkings, D., 4:321
Heydinger, A. G., 4:29
Hsiung, B., 4:275
Hung, S. L., 4:321

Jennings, A. A., 4:29

Kamal, O., 4:133
Krishnamoorthy, C. S., 4:75

Lambourne, J. J., 4:21, 307
Léger, P., 4:127
Leung, A. Y. T., 4:39, 107, 237
Leung, Y. W., 4:39, 107
Lin, K.-H., 4:257
Lo, S. H., 4:317

Monasa, F. F., 4:149
Mufti, A. A., 4:275
Mullen, R., 4:91

Nemeth, Z. A., 4:87
Niedswecki, J. M., 4:1

Puckett, J. A., 4:81
Purasinghe, R., 4:91

Rajeev, S., 4:75
Richardson, J. B., 4:81
Riggs, L. S., 4:229
Roschke, P. N., 4:267
Roufaiel, M. S. L., 4:149

Stiemer, S. F., 4:205
Sutherland, F. R., 4:307

Utku, S., 4:167

Vaideeswaran, S., 4:75

Walton, D. J., 4:99

Xie, J. R., 4:317

Yeh, C., 4:247

SUBJECT INDEX TO VOLUME 4

- Area method
 - for region recognition, 4:81
- Automation
 - in engineering design, 4:1
- Boundary integral equation method
 - p-adaptive, approach for two dimensional elasticity analysis, 4:11
- Carbon monoxide
 - modeling dispersion near a vehicular tunnel, 4:217
- Computer-aided design
 - tight coupling of microcomputers in, 4:257
- Concrete panels
 - irregular, optimal pick-up locations for, 4:267
- Coupling
 - tight, of microcomputers in a computer-aided design environment, 4:257
- Critical path method networks
 - risk management in, 4:229
- Dispersion
 - of carbon monoxide near a vehicular tunnel, modeling, 4:217
- Eigenvectors
 - computation on concurrent processors, 4:167
- Elasticity analysis
 - two dimensional, the p-adaptive boundary integral equation method approach for, 4:11
- Engineering design
 - innovative, 4:1
 - perceptron learning in, 4:247
- Engineering software
 - development within a generic application framework, 4:205
- Equation solver
 - an efficient and flexible out-of-core, 4:297
- Expert system
 - for regulatory review of hazardous waste surface impoundment dikes, 4:29
- Expert systems
 - for integrated structural design, structuring knowledge and data bases in, 4:175
- Finite element analysis
 - linear static and dynamic, finite element method, 4:245
 - on microcomputers, improved iterative solution for, 4:91
- Frontal solver in C
 - dynamics, 4:107
 - statics, 4:39
- Geodesics
 - numerical procedure for evaluating on a surface, 4:317
- GURU
 - review of, 4:321
- Hazardous waste surface impoundment dikes
 - expert system for regulatory review of, 4:29
- Hermitian subspace iteration, 4:237
- Highway design
 - spiral spline curves for, 4:99
- Hydrological data
 - a user-friendly management and reporting system, 4:21
- Hydrological stimulation and water resource problems
 - a graphics utility for integration in, 4:307
- Integration
 - in water resource and hydrological stimulation problems, a graphics utility for, 4:307
- Interactive data editor
 - a microcomputer user interface for batch programs, 4:75
- Iterative solution
 - improved, for finite element analysis on microcomputers, 4:91
- Microcomputers in education
 - a microcomputer interactive graphics software for design of steel trusses, 4:149
- Natural gas distribution
 - rural, microcomputer workstation for design of, 4:61
- Parallel structural analysis
 - using threads, 4:133
- Perceptron learning
 - in engineering design, 4:247
- Personal Consultant Easy
 - review, 4:163
- Personal Consultant Plus
 - review, 4:243
- Region recognition
 - using area method, 4:81
- Risk management
 - in critical path method networks, 4:229
- Solid modeling
 - in structural engineering, 4:275
- Spiral spline curves
 - for highway design, 4:99
- Steel structures
 - microcomputer-based optimization in professional practice, 4:289
- Structural analysis
 - parallel, using threads, 4:133
- Structural design
 - integrated, structuring knowledge and data bases in expert systems for, 4:175
- Structural dynamic problems
 - large, microcomputer solution of, 4:127
- Structural engineering
 - solid modeling in, 4:275
- Subspace iteration
 - Hermitian, 4:237
- Threads
 - parallel structural analysis using, 4:133
- Traffic analysis
 - new technology and solutions, 4:87
- Trusses
 - steel, a microcomputer interactive graphics software for design of, 4:149
- User interface
 - microcomputer, for batch programs, interactive data editor, 4:75
- Water resource and hydrological stimulation problems
 - a graphics utility for integration in, 4:307
